Emergency Sewer Repair to Close South Mission Road

The Pima County Regional Wastewater Reclamation Department has contracted with KE&G Construction, Inc. to complete an emergency sewer repair in the intersection of S. Mission Road and Irvington Place. **Repair work will begin this Monday, July 6, at 6 a.m. and will last approximately seven days.**

Major lane restrictions will be in effect throughout the duration of the project:

- There will be a three-way stop in the intersection of S. Mission Road and W. Via Ingresso.
- Southbound S. Mission Road between W. Via Ingresso and Irvington Place will turn into a two-way road to accommodate traffic to and from Associated Dental Care only.
- Northbound S. Mission Road between W. Via Ingresso and Irvington Place will turn into a two-way road to accommodate traffic to and from residential areas located along Irvington Place (east of S. Mission Road) and W. Mission Place and will also serve to provide access to and from Charity Tabernacle. These areas will not be accessible from W. Irvington Road.
- Northbound S. Mission Road between W. Irvington Road and Irvington Place will be completely closed to all traffic.
- Southbound S. Mission Road between W. Irvington Road and W. Sindle Place will turn into a two-way road to accommodate traffic to and from residential areas west of S. Mission Road/north of W. Irvington Road only.
- Those who live west of S. Mission Road/north of W. Irvington Road and use Irvington Place to enter or exit their neighborhood can use W. Sindle Place or S. Jamaica Way as an alternate route.

Repair activities will be conducted using open excavation. Construction traffic, traffic controls, heavy equipment, construction workers and vehicles will be present. **Please exercise caution during construction activities.**

Construction times are approximate and are subject to change in the event that unforeseen conditions cause delays or postponements.
