Traffic Alert
Twin Peaks-Blue Bonnet Road
Gravity Sewer Project

This is a series of traffic alerts that will be issued throughout the construction of the Pima County Regional Wastewater Reclamation Department’s Twin Peaks-Blue Bonnet Road Gravity Sewer Project. These alerts will announce construction, detours and street closure information as it affects traffic. Please watch for updated traffic alerts as construction activities progress.

Pima County Regional Wastewater Reclamation Department (RWRD) and their contractor, Achen Gardner, have begun installation of a 15-inch sewer interceptor line along Hartman Lane, between Linda Vista Boulevard and Cortaro Farms Road. The contractor began work south of the intersection at Cortaro Farms Road and is working northward toward Linda Vista Boulevard. The sewer installation along Hartman Lane is expected to be complete in September 2019.

Sections of Hartman Lane will be completely closed to motorists, pedestrians and bicyclists in the area where the contractor is working.

NOTICE: It is unlawful for citizens to move or drive around traffic control devices within a construction zone and doing so could result in a fine. Additionally, driving through an active construction site is dangerous to you and the workers and could result in damage to your vehicle and/or bodily harm. Please obey all traffic control within the construction zone.

On Friday, August 2, the contractor will begin sewer installation along Hartman Lane between Overton Road and Whipsnake Way. (SEE MAP) This closure will be in place 24-hours per day.

- Southbound only turn movements will be permitted from Overton Road.
- Access to Cottonmouth Street can be reached via Whipsnake Way.
- North and southbound travel will be permitted on Hartman Lane between Cortaro Farms Road and Overton Road.
- There is no access to Cortaro Farms Road from Hartman Lane north of Overton Road.

Residents and the traveling public should watch for informational signs with detour information.

Emergency access will always be provided.

The above work schedule may be impacted by weather or mechanical failure. During the sewer pipe installation, there will be extensive trenching and large equipment entering and exiting the work area. Motorists should remain alert and use caution when driving near construction activities.
