

**November 21, 2019**

**Traffic Alert  
Twin Peaks-Blue Bonnet Road  
Gravity Sewer Project**

This is part of a series of traffic alerts and project updates that will be issued throughout the construction of the Pima County Regional Wastewater Reclamation Department’s **Twin Peaks-Blue Bonnet Road Gravity Sewer Project**. These alerts will announce construction, detours and street closure information as it affects traffic. **Please watch for updated traffic alerts as construction activities progress.**

**Pima County Regional Wastewater Reclamation Department (RWRD) and its contractor, Achen Gardner, have completed the installation of the 15-inch sewer interceptor line along Hartman Lane, from Linda Vista Boulevard to Cortaro Farms Road.**

**The Team wishes to thank the residents and the traveling public for their patience and support while improvements to the sewer system were completed.**

The contractor is **currently working** along the east side of Twin Peaks Road on the final phase of the project, which includes installation of a new 15-inch diameter sewer interceptor line and 22 manholes from Blue Bonnet Road north to Tangerine Road.

The contractor has completed a *jack and bore operation* (drilled an underground, horizontal hole without disturbing the surface roadway) at the intersection of Twin Peaks/Dove Mountain and Tangerine Road. Additionally, the 30-foot sewer easement is located outside of the heavily travelled Twin Peaks Road travel lanes ensuring that this portion of the project will have minimal impact to the traveling public.

**In honor of Thanksgiving, there will be no construction related activities Thursday, November 27 through Sunday, December 1, 2019. Regular construction will resume on Monday, December 2, 2019.**

**DON'T FORGET Pima County's Grease Collection Recycling Event (Cooking Grease Only)**

Fats, Oils, and Grease (FOG) from your kitchen should never be poured down your drain. Instead, store it in a can and bring to our **15<sup>th</sup> Annual Grease Collection and Recycling Event on January 4, 2019 from 9:00 a.m. to 1:00 p.m.**

FOG adheres to the inside of pipes within the sewer system and over time will clog sewer lines completely. Wastewater travels to water reclamation facilities using gravity and is unable to flow through the pipes. These blockages can result in a Sanitary Sewer Overflow (SSO). An SSO is the backup of raw sewage into the street, the environment, or even into your house or business through sinks, tubs, showers, or toilets.

**Grease Collection and Recycling Locations**

East	O'Reilly Chevrolet	6160 E. Broadway Blvd.
Midtown	City Council Ward 3 Office	1510 E. Grant Rd.
Northwest	Pima Community College Northwest Campus	7600 N. Shannon Rd
South	Kino Sports Complex	2500 E. Ajo Way
Sahuarita	Sahuarita Town Hall Complex	375 W. Sahuarita Center Way
West	Pima Community College West Campus	2202 W. Anklam Rd.

**Residents and the traveling public should watch for informational signs with detour information.**

**Emergency access will always be provided.**

**The above work schedule may be impacted by weather or mechanical failure.**

During the sewer pipe installation, there will be extensive trenching and large equipment entering and exiting the work area.

Motorists should remain alert and use caution when driving near construction activities.
