Construction Alert Old Nogales Interceptor Sewer Improvement Project

In January 2021, Pima County Regional Wastewater Reclamation Department (Pima County) and its contractor Borderland Construction began work on the final phase of the Old Nogales Interceptor Sewer Improvement Project. This final phase extends from 36th Street, near Euclid Avenue, south to Aerospace Parkway, generally following the Union Pacific Railroad alignment.

On Tuesday July 5, 2022, the contractor will begin sewer improvement/rehabilitation work in the vicinity of the intersection of Los Reales Road/Nogales Highway. Work will consist of trenching, excavation, sewer line replacement, repaving and striping the disturbed portions of roadway, and final cleanup.

We anticipate the scheduled work to be completed in approximately one month – ***however, rain could impact the scheduled timeframe.***

The following lane restrictions will be in place; however, motorists should note that lane restrictions will change as work progresses through the area ([see map](#)).

- Northbound Nogales Highway will be reduced to one travel lane in the vicinity of the Los Reales Road/Nogales Highway intersection.
- All turn movements at the intersection will be maintained.
- No construction related lane restrictions on southbound Nogales Highway.

**The above schedule could change due to mechanical failure
or weather-related issues.**

Pima County and its contractor will issue traffic alerts during the construction of the Old Nogales Interceptor (ONI) Sewer Improvement Project. The alerts will announce construction, detours, and street closure information as it affects traffic. Please sign up to receive traffic alerts that detail construction activities by clicking the “*Stay In Touch*” button at the bottom of the project web page www.sewerimprovements.info

The Old Nogales Interceptor Sewer Improvement Project is designed to increase capacity of the existing Old Nogales Interceptor (ONI) and the Park Avenue Sewer in addition to installing new sewer infrastructure to manage the future anticipated flows along the new Aerospace Corridor and Aerospace Parkway. The total length of the project is nearly 14 miles and extends west along Old Vail Connection Road from the Wilmot State Prison to Nogales Highway and north along the east side of Nogales Highway, where it discharges into the Southeast Interceptor at 36th Street and Euclid Avenue.

**For your safety, please observe all traffic control,
message boards and reduced speed limits.**

Watch for construction personnel and equipment in the work zone.
