Continental Ranch Regional Pump Station Force Main Augmentation Project

Borderland Construction, under contract with Pima County Regional Wastewater Reclamation Department, has begun construction to install the new dual 24-inch pipe from the Continental Ranch Regional Pump Station (CRRPS), ultimately tying-in to the completed segment south of the Crossroads at Silverbell District Park between Cortaro and Ina roads.

The contractor is nearly finished installing new bank protection and relocating a portion of the Loop pathway near the new Amazon facility north of Ina Road. The bank protection improvements provided the opportunity to raise a portion of the Loop pathway out of the Santa Cruz River flood zone, giving the public a safer more reliable experience. ([See map for paving and closure areas](#))

- On Monday, December 19, 2022, access to the Loop will be CLOSED along the west side of the Santa Cruz River, between Ina and Cortaro roads, while the contractor paves the new Loop pathway alignment near the Amazon facility.
- Closures will be in place from 6 a.m. to 6 p.m.

When complete, the project will provide seven miles of a new dual force main sewer system between the Continental Ranch Regional Pump Station (CRRPS), and the Tres Ríos Water Reclamation Facility (WRF). The Loop travelers will also enjoy a newly paved pathway that will be installed from the El Rio Preserve area to Cortaro Road. The project is expected to be complete by early 2024.

Emergency access will always be provided.
