Traffic Alert
North Rillito Interceptor (NRI)
Sewer Rehabilitation Project

A series of traffic alerts will be issued throughout the construction of the North Rillito Interceptor (NRI) Sewer Rehabilitation Project. These alerts will announce construction, detour and street closure information as it affects residents, businesses and traffic within the area. The 10-mile long NRI project is being completed in phases; the current phase’s construction boundaries are along River Road from Longfellow Avenue to just west of Campbell Avenue.

The contractor is continuing work on the rehabilitation of sewer facilities located in the area of River Road between Longfellow Avenue and Sutton Lane. The temporary flow management piping (FMP) is installed and will remain in place until this phase of the rehabilitation is complete. Approximately the end of December 2015.

On Monday, December 7, the contractor will begin the Cured in Place Pipe (CIPP) lining process at the River Road/Sutton Lane intersection. Manhole rehabilitation/reconstruction will follow the CIPP lining process. Most work is scheduled from 6 a.m. to 6 p.m. with the exception of the CIPP lining which cannot be interrupted once it begins. Work at this intersection is scheduled to be completed by Christmas, weather permitting.

- 24-hour traffic control will be in place while work is completed.
- East and westbound traffic at the River Road/Sutton Lane intersection will be shifted around the work area.
- Access will be maintained to Sutton Lane, however, the following traffic control will be in place:
  - A designated left turn lane from eastbound River Road to northbound Sutton Lane will be provided.
  - Right turns only will be permitted from southbound Sutton Lane to River Road. Left turns will be restricted.
  - Right turns from westbound River Road to northbound Sutton Lane will be permitted.

Traffic along River Road, between Longfellow Avenue and Sutton Lane, will continue to be shifted back and forth to accommodate work in the area. One travel lane in each direction will be maintained. The location of some manholes along River Road may require temporary side-street turn restrictions to ensure the safety of workers and the traveling public.

Motorists traveling through the area should expect delays. Bicyclists and pedestrians should use caution when riding/walking through the area.
