Traffic Alert
22nd Street Sewer Augmentation Project
Swan Road to Alvernon Way

This is a series of traffic alerts that will be issued throughout the construction of the 22nd Street Sewer Augmentation Project. These alerts will announce construction, detour and street closure information as it affects traffic.

The following traffic control will be in place while the contractor completes manhole adjustments along 22nd Street and in the 22nd Street/Alvernon Way intersection. While this work is completed, various travel lanes will be closed for 24-hour-periods to allow time for concrete to cure before the travel lane is re-opened to traffic.

Monday, September 26, through Friday, September 30, 2016

- **Westbound 22nd Street from Bryant Avenue to Alvernon Way** will be reduced to two through-travel lanes.
- **Southbound Alvernon** will be reduced to two-through travel lanes. One left-turn and right-turns will be maintained.

Wednesday, September 28 through Thursday, September 29, 2016

- Left-turn movements from **northbound Alvernon Way to westbound 22nd Street** will be reduced to one-lane.
- Left-turn movements from **westbound 22nd Street to southbound Alvernon Way** will be reduced to one-lane.

Upcoming work at the intersection of Alvernon Way and 22nd Street will require overnight restrictions to all left-turn movements while the contractor installs a survey monument in the center of the intersection. Please watch for advance notice of this restriction.

Business access will be maintained.

For your safety, please observe all traffic control signage, message boards and obey reduced speed limits. Watch for construction personnel and equipment in the work zone.
