

TRAFFIC ALERT  
Pima County Regional Wastewater Reclamation Department  
Tucson Boulevard Diversion Structure Rehabilitation

June 23, 2022

Hunter Contracting Company, under contract with the Pima County Regional Wastewater Reclamation Department, has begun a sewer improvement project to replace the existing diversion structure located at the north end of Tucson Boulevard.

The traveling public will see equipment, aboveground pipes, work crews, and traffic/pedestrian restrictions during this improvement project.

**Beginning at 7 p.m. Wednesday, June 29, through 3 p.m. Thursday, June 30**, the contractor will install cured-in-place pipe (CIPP) from the new diversion structure to a manhole located at the northern end of the University of Arizona property. There will not be any impacts to motorists, bicyclists, or pedestrians. Light plants, used during the overnight hours, will be directed away from any residential properties. People in the area may notice a slight odor during the CIPP lining process.

A **cured-in-place pipe (CIPP)** is a trenchless rehabilitation method used to repair existing pipelines. It is a jointless, seamless pipe lining within an existing pipe.

**The contractor is scheduled to complete** trenching and placement of the 54-inch diameter pipe along the west side of Tucson Boulevard, from Desert Archeology south to the area of Gentleman's Ranch **by Friday, July 8, 2022**

- Tucson Boulevard will be reduced to one travel-lane from Allen Road to the north end of Tucson Boulevard.
- Flaggers will be on site to direct alternate one-way travel.
- Access to residential property and emergency responders will always be maintained.
- **Repaving the disturbed areas of roadway** will begin immediately following the pipe installation, and is expected to be completed by the end of August 2022 – weather permitting.

Alerts will be issued throughout the project and will announce field activities and potential impacts to local traffic, pedestrians and/or Loop users. **Please watch for updated alerts as the project progresses. You can also sign up on the project website [www.sewerimprovements.com](http://www.sewerimprovements.com) to receive electronic notifications delivered to your email account.**

Emergency access will always be provided.

\*The above work schedule may be impacted by weather or mechanical failure.
